Company overview

At ASCO, we create solutions to improve the efficiency of our customers' operations around the globe. We strive to be the essential partner in oil and gas materials and equipment management from demand creation to fulfilment (and back again). Delivering a wide range of integrated solutions and specialist services across all areas of logistics, materials, marine and waste, we make a material difference to our customers' operations.

With approximately 1,500 employees covering seven countries, we serve the oil and gas industry across six continents. We bring over 50 years of specialised knowledge and skills to the oil and gas industry and build life-long partnerships by transforming our customers' operational efficiency, improving processes and developing advanced capabilities in each of our service lines.

What we do

Logistics - Our logistics operations are the physical handling of materials within the supply chain. We drive efficiency and eliminate the risk associated with managing, controlling and transporting oil and gas materials and equipment across the globe.

Materials - Our integrated approach to managing the oil and gas materials management discipline, blends work execution with the provision of processes, systems and continuous service improvement to enhance materials efficiency across the supply chain.

Marine - Marine operations are often one of the highest cost and highest risk area of your supply line. We work to enhance the efficient utilisation of your fleet and to support the mitigation of risk and cost.

Waste - Waste is an issue which affects every industry. Legislation in this area is constantly evolving which means safe and efficient management and reduction of waste materials are increasingly important.

“

We bring over 50 years of specialist knowledge and skills to the oil and gas industry.
