

Loft Management & Lifting Equipment Examiner

Practical Training Course

2 Day

Overview: Familiarises delegates with functional aspects of managing and running a Rigging Loft, in addition to providing them with the techniques required to confidently examine and inspect lifting equipment, appliances and accessories.

Contents:

- Key aspects of the Rigging Loft
- The Rigging Loft Register
- Roles and Responsibilities
- Managing Uncontrolled, Transit and 3rd Party Equipment
- Legal Requirements
- Common Faults and Rejection Criteria
- Construction and Safe Working Loads
- Examination of Wire Ropes
- Examination of Various Types of Lifting Gear
- Lifting Gear Rejection Criteria
- Cumulative Discard Factors of Wire Ropes
- Normal Wear and Discard Criteria
- Lubrication and Maintenance
- Practical and written assessments

Structure: The course ends with a written test paper and the successful delegates are issued with an NSL certificate of training.

Details: This course is usually delivered at an NSL Training Centre, but can be delivered at a client's premises.

Course handouts: The International Rigging & Lifting Handbook.

PPE required: Coveralls, hard hat, safety boots and gloves.
